

Corporate Profile

The Company

ProEnvironmentWare, Inc., a privately-held company, is the developer of Web-based technology solutions for industrial, commercial, institutional and government facilities seeking to better manage their regulatory compliance obligations. The company's flagship product, ProComplianceWare™ is a cost-effective Web-based compliance management system.

Compliance regulations have been put in place by the government to protect lives and property. But when companies fail to meet these requirements – training, permits, inspections, certificates, licenses – lives and property are at risk. Also, the cost of penalties and fines to companies who miss deadlines can be substantial, or put them out of business. ProEnvironmentWare solutions mitigate these risks.

Products

ProComplianceWare

ProComplianceWare™ (PCW) helps companies manage regulatory compliance, reducing the risk of penalties and fines from expanding government regulations of the environment, health, safety, and security (EHSS). Using PCW and being compliant can help save lives, protect property and reduce regulatory liability and exposure.

The cloud-based system organizes regulatory reporting and permits, delivers email notices for due dates, provides searchable document archives, and manages compliance training.

Any facility regulated by the Federal or state agencies can use PCW, including marinas, airports, automobile dealerships, chemical distributors, scrap yards, schools, universities, municipalities and other organizations of all sizes. PCW improves permit/report organization, compliance due date tracking, and provides a searchable document archive.

Features and Benefits

PCW tracks compliance requirements and manages documents in one secure online location, improving record keeping and adherence to Federal and state regulations. The software internally monitors

compliance with tasks delegated to staff or consultants. Users can review stored documents by accessing the "*View Completed Documents*" function in each module, which displays whether assigned tasks are being performed and who is performing them.

The most cost-effective EHSS system of its kind, PCW:

- Organizes compliance certification requirements.
- Offers a simple and intuitive user interface.
- Enables uploading compliance documents for archival storage.
- Provides links to all needed compliance assessment templates and report forms.
- Electronically tracks compliance deadlines for inspection reports, training and sampling.
- Sends an email to assigned staff when compliance audit deadlines approach.
- Alerts senior management or auditors when compliance deadlines are not met.
- Allows access to compliance reports.
- Provides different levels of administrator and staff access.
- Records the date and user making any change or uploading a document.
- Enables 24/7 cloud-based access to records from computers, tablets or smartphones.
- Operates in an encrypted, secure (SSL) environment.
- Safely manages compliance documents in one secure, online location.
- Assures adherence to all permits and environmental requirements.
- Reduces the risk of compliance penalties and fines.

PCW is a cloud-based online system – no software to install or update. The system is hosted on a virtual private server using a multi-homed network, fully-switched and collision-free, with external connections to five diverse backbone networks for maximum reliability. The PCW site uses Secure Sockets Layer (SSL) to assure data security.

Real-time access to records provides corporate offices or third party consultants on any computer, tablet or smartphone. No other compliance software provides what PCW delivers to improve compliance, providing peace of mind.

Priced at only \$250* per month, PCW can be easily set up by in-house staff, compliance consultants, environmental engineers, or PCW's team. For more information visit www.ProComplianceWare.com.

ProTrainingWare

A customizable web-based software application supporting the development and administration of in-house personnel training programs for small and medium-sized businesses, ProTrainingWare™ (PTW) provides centralized administration systems for posting a broad range of educational materials, grading exams, monitoring participant accounts, and creating program reports.

StormWaterSamplingAlert

A web-based weather alert system developed in conjunction with CustomWeather, Inc., StormWaterSamplingAlert™ delivers detailed and accurate email notices of the arrival of storms that meet the criteria for a sampling event for industries subject to an Industrial Stormwater General Permit.

Regulatory Compliance and Sustainability

Today, sustainable regulatory compliance practices are a necessity to survive and grow in the global business environment. Negligence in compliance with EHSS regulations can create serious reputation and financial problems, and in some states, regulators require the implementation of electronic reporting systems.

Management Team

ProEnvironmentWare, Inc., was formed by three professionals with substantial experience in the areas of environmental consulting, programming and law - who recognized the need for products that would provide improved permit report organization, email compliance due date alerts, searchable document archives, and sophisticated training programs.

- **Edward Sailer, CHMM, LEP, President** – is an environmental consultant with almost 35 years of experience in both the public and private sectors. He has developed environmental compliance systems for companies ranging from commercial hazardous waste facilities to small industrial facilities including marinas.
- **David Watson, Vice President** – has extensive experience in software development and serves as the company's technology architect. He practiced as a civil/environmental engineering consultant for 20 years before committing the last ten years to a range of web-based programming projects.
- **William Spencer, General Council** – is an attorney with over 30 years of experience in commercial law, regulatory matters, and permitting issues. He has served as counsel and General Counsel to numerous companies, including international manufacturers, and is currently in private practice specializing in environmental law.
