ProComplianceWare™, a cost-effective Web-based compliance management system, helps companies manage regulatory compliance, reducing the risk of penalties and fines from ever-expanding government regulations for the environment, health, safety, and security. ProComplianceWare (PCW) delivers cloud-hosted organization for regulatory reporting and permits, and includes email notices for due dates, searchable document archives and compliance training.

Any facility regulated by the Environmental Protection Agency (EPA) or other Federal and state agencies can use PCW – from marinas to airports, or automobile dealerships to chemical distributors and scrap yards to private schools.

The regulatory compliance software tracks compliance requirements and manages documents in one secure online location, improving record keeping and adherence to EPA, Federal or state regulated permits.

PCW internally tracks compliance with tasks delegated to staff or consultants. Users can review stored documents by accessing the "*View Completed Documents*" function in each module, which displays whether assigned tasks are being performed and who is performing them.

The most cost-effective EHSS system of its kind, PCW:

- Organizes compliance certification requirements.
- Slashes the risk of penalties and fines.

- Can be easily set up by in-house staff, compliance consultants, engineers, or ProEnvironmentWare, Inc.'s team.
- Provides links to all needed compliance assessment templates and report forms.
- Electronically tracks compliance deadlines for all required inspection reports, training and sampling.
- Sends an email to assigned staff when compliance audit deadlines approach.
- Enables uploading compliance documents for archival storage.
- Records the date and user making any change or uploading a document.
- Allows access to compliance reports
- Operates in an encrypted, secure (SSL) environment.
- Provides different levels of administrator and staff access.

Real-time access to records can be provided to corporate offices or consultants on any computer, tablet or smartphone. No other compliance software provides what PCW delivers to improve compliance, providing peace of mind.

Even with the most skilled staff compliance issues are often missed, inspection reports lost and agency submissions overlooked. Millions of dollars in penalty fees are assessed to businesses every year.

Priced at only \$250 per month, PCW can be easily set up by in-house staff, compliance consultants, environmental engineers, or ProEnvironmentWare's, team. For more information visit www.ProComplianceWare.com

- Allows access to compliance reports
- Operates in an encrypted, secure (SSL) environment.
- Provides different levels of administrator and staff access.

Real-time access to records can be provided to corporate offices or third party consultants on any computer, tablet or smartphone. No other compliance software provides what PCW delivers to improve compliance, providing peace of mind.

ProComplianceWare addresses the four "R's" typically faced by businesses or facilities with a multitude of regulatory compliance regulations and requirements:

REGULATION: With thousands of regulations, facility-specific permits and many regular inspections and sampling work to be performed, it's difficult for businesses to track all the requirements relating to environmental, health, safety and security compliance.

RISK: Even with the most skilled staff compliance issues are missed, inspection reports are often lost and agency submissions overlooked. Millions of dollars in penalty fees are assessed to businesses every year.

RESPONSE: The comprehensive system displays all applicable regulatory requirements, linking needed inspection forms, archiving completed reports, and issuing email reminders for all required actions.

RESULT: A reduction in the risk of non-compliance and the commensurate financial impacts from penalties and fines.

Priced at only \$250 per month, PCW can be easily set up by in-house staff, compliance consultants, environmental engineers, or ProEnvironmentWare's, team. For more information visit www.ProComplianceWare.com
