

FOR IMMEDIATE RELEASE

## ProEnvironmentWare Taps New Clients to Deploy ProComplianceWare for Compliance Management

**MADISON, CT– (June 9, 2015)** –ProEnvironmentWare, Inc., a developer of Web-based regulatory compliance solutions, today announced the acquisition of two new customers. [Gateway Terminals LLC](#), an established, fully licensed and bonded deep-water marine terminal operator began using the company’s flagship product, ProComplianceWare™ (PCW) in April, and [Beacon Point Marine](#), a certified Clean Marina and five-star authorized dealer for new and quality pre-owned vessels, signed up in June.

A Web-based technology solution, [ProComplianceWare](#) (PCW), is a cost-effective Web-based compliance management system that helps companies manage regulatory compliance, reducing the risk of penalties and fines from ever-expanding government regulations for the environment, health, safety, and security (EHSS).

Each company will use the PCW [regulatory compliance software](#) to track and manage compliance requirement documents and permits in one secure online location. PCW delivers cloud-hosted organization for regulatory reporting, offers searchable document archives, and compliance training, and improves record keeping and adherence to EPA, Federal or state regulated permits.

“Companies have finally started recognizing they need to get rid of their old legacy systems of paper binders and upgrade to compliance technology solutions like ProComplianceWare to get better control of their permits, regulations, and calendars,” said Ted Sailer, CHMM, LEP, and president. PCW can maximize profit by mitigating risks and costs associated with regulatory compliance.” Sailer is an environmental consultant with 35 years of experience in both the public and private sectors.

PCW internally tracks compliance with tasks delegated to staff or consultants who are alerted when compliance audit deadlines approach, and alerts senior management or auditors when compliance deadlines are not met, allowing access to compliance reports anytime, anywhere. It also provides different levels of administrator and staff access, records the date and user making any change or uploading a document. PCW operates in an encrypted, secure (SSL) environment and assures adherence to all permits and environmental requirements, reducing the risk of compliance penalties and fines.

### About ProEnvironmentWare

ProEnvironmentWare, Inc., a privately-held company, is the developer of Web-based technology solutions for industrial, commercial, institutional and government facilities seeking to better manage their regulatory compliance obligations.

The company's flagship product, ProComplianceWare™, a cost-effective Web-based compliance management system, helps companies manage regulatory compliance, reducing the risk of penalties and fines from ever-expanding government regulations for the environment, health, safety, and security. Please visit [www.ProComplianceWare.com](http://www.ProComplianceWare.com)

ProTrainingWare (PTW) is a customizable Web-based software application supporting the development and administration of in-house personnel training programs for small and medium-sized businesses. PTW provides centralized administration systems for posting a wide range of educational materials, grading exams, monitoring participate accounts, and creating summary reports.

ProEnvironmentWare's StormWaterSamplingAlert is a Web-based weather alert system, developed in conjunction with CustomWeather, Inc., delivering detailed and accurate email notices of the arrival of storms that meet the criteria for a sampling event for industries subject to the Industrial Stormwater General Permit.
