Regulatory Environmental Compliance Industry Trends for 2016

– Environment Analyst **projected that the global EC market will reach US$ 32.6 billion in the next five years, an increase from 2013 of 13.5%–**

MADISON, CT– (January 6, 2016) –ProEnvironmentWare, Inc., a developer of Web-based regulatory compliance solutions, today shared one analysts forecast for the global environmental consulting market projecting that the global EC market will reach US$ 32.6 billion in the next five years, an increase from 2013 of 13.5 percent **–** according to the latest report by *Environment Analyst*. Public and private sector demand for environmental consultants and compliance management as companies seek to reduce their carbon footprint and improve their reputations, which strengthens demand for the industry.

ProEnvironmentWare develops Web-based technology solutions including its flagship product, ProComplianceWare™ (PCW), a cost-effective Web-based compliance management system that helps companies manage regulatory compliance, reducing the risk of penalties and fines from ever-expanding government regulations for the environment, health, safety, and security (EHSS). An indispensable tool for any business that wants to monitor its environmental impact, PCW can maximize profit by mitigating risks and costs associated with environmental compliance.

"There are many, many environmental deadlines we have to meet, and PCW is an awesome reminder system — truly the backbone of the system. It already saves us money and will save us money for years to come." Harry Hallgring, HR/Safety Director, New England Boatworks

The regulatory agencies have been updating and expanding their use of technology for the past few years to get better control data – including new regulations and policies, with an eye towards examination. In fact, regulatory agencies look favorably at exam time on advisory firms and companies that have pro-actively implemented compliance technology.

PCW regulatory compliance software tracks compliance requirements and manages documents in one secure online location, improving record keeping and adherence to EPA, Federal or state regulated permits. PCW delivers cloud-hosted organization for regulatory reporting and permits, and includes email notices for due dates, searchable document archives and compliance training.

"Companies have finally started expanding their use of technology to get better control of their own data. And, in fact, regulatory agencies look favorably to those firms that have pro-actively implemented compliance technology, "said Ted Sailer, CHMM, LEP, and president. "New regulations and concerns over environmental awareness continues to stimulate our industry's annual growth."

PCW assists smaller businesses who are regulated by the Environmental Protection Agency (EPA) or other Federal and state – from marinas to airports, or automobile dealerships to chemical distributors and scrap yards to private schools." Sailer is an environmental consultant with 35 years of experience in both the public and private sectors.

PCW safely manages compliance documents in one secure, online location and electronically tracks deadlines for all required inspections, reporting, training, and sampling. It delivers cloud-hosted organization for regulatory reporting and permits and includes email notices for due dates, searchable document archives, and compliance training.

PCW internally tracks compliance with tasks delegated to staff or consultants. Users can review stored documents by accessing the *"View Completed Documents"* function in each module, which displays whether assigned tasks are being performed and who is performing them. Staff or management are alerted when compliance audit deadlines approach; while PCW alerts senior management or auditors when compliance deadlines are not met, allowing access to compliance reports. It also provides different levels of administrator and staff access, records the date and user making any change or uploading a document. PCW operates in an encrypted, secure (SSL) environment and assures adherence to all permits and environmental requirements, reducing the risk of compliance penalties and fines.

About ProEnvironmentWare
ProEnvironmentWare, Inc., a privately-held company, is the developer of Web-based technology solutions for industrial, commercial, institutional and government facilities seeking to better manage their regulatory compliance obligations.

The company's flagship product, ProComplianceWare™, a cost-effective Web-based compliance management system, helps companies manage regulatory compliance, reducing the risk of penalties and fines from ever-expanding government regulations for the environment, health, safety, and security.
