

FOR IMMEDIATE RELEASE

New ProComplianceWare Brand Logo and Website Aim to Assist Companies Seeking Affordable Web-based Regulatory Compliance Solutions

– ProComplianceWare is an easy to use, affordable Web-based regulatory compliance solution targeting smaller business and facilities for as little as \$250 per month –

MADISON, CT– (January 27, 2016) –ProEnvironmentWare, Inc., a developer of Web-based regulatory compliance solutions, today announced the company’s new brand logo and responsive website for its flagship product [ProComplianceWare™](#) (PCW), a cost-effective Web-based compliance management system that improves adherence to EPA Federal or state regulated permits.

The brand launch will help the company better reach target industries to meet the industry growth over the next five years as companies seek to better manage [regulatory compliance](#), reducing the risk of penalties and fines from ever-expanding government regulations for the environment, health, safety, and security (EHSS). *Environment Analyst* projected that the global environmental consulting (EC) market alone will reach US\$ 32.6 billion in the next five years, an increase from 2013 of 13.5%

Facilities regulated by the Environmental Protection Agency (EPA) or other Federal and state agencies can use PCW – from marinas to airports, or automobile dealerships to chemical distributors and scrap yards to private schools.

“Our goal has always been to accommodate smaller business and facilities with an affordable solution so they can meet regulatory compliance demands with ease,” said [Edward Sailer](#), 30-year environmental consulting veteran, president and co-founder of ProEnvironmentWare. “Compliance management often falls on busy managers with multiple responsibilities. Staying on top of permit requirements that are poorly documented and not easily accessible can lead to non-compliance enforcement actions and hefty fines. ProComplianceWare is an easy to use, affordable solution for as little as \$250 per month.”

PCW safely manages compliance documents in one secure, online location and electronically tracks deadlines for all required inspections, reporting, training, and sampling. It is an indispensable tool for any business that wants to monitor its environmental impact and maximize profit by mitigating risks and costs associated with environmental compliance. ProComplianceWare delivers cloud-hosted organization for regulatory reporting and permits and includes email notices for due dates, searchable document archives, and compliance training.

PCW internally tracks compliance with tasks delegated to staff or consultants, and management is alerted when compliance audit deadlines approach. Users have 24/7 cloud-based access to records from computers, tablets or smartphones where they can review stored documents and determine

whether assigned tasks are being performed and who is performing them. PCW alerts senior management or auditors when compliance deadlines are not met, allowing access to compliance reports. PCW also provides different levels of administrator and staff access, records the date and user making any change or uploading a document.

PCW operates in an encrypted, secure (SSL) environment and assures adherence to all permits and environmental requirements, reducing the risk of compliance penalties and fines.

About ProEnvironmentWare

[ProEnvironmentWare, Inc.](#), a privately-held company, is the developer of Web-based technology solutions for industrial, commercial, institutional and government facilities seeking to better manage their regulatory compliance obligations.

The company's flagship product, [ProComplianceWare™](#), a cost-effective Web-based compliance management system, helps companies manage regulatory compliance, reducing the risk of penalties and fines from ever-expanding government regulations for the environment, health, safety, and security. ProComplianceWare delivers cloud-hosted organization for regulatory reporting and permits, and includes email notices for due dates, searchable document archives and compliance training.

The company's other solutions include ProTrainingWare (PTW), a customizable Web-based software application supporting the development and administration of in-house personnel training programs for small and medium-sized businesses. PTW's StormWaterSamplingAlert is a Web-based weather alert system, developed in conjunction with CustomWeather, Inc., delivering detailed and accurate email notices of the arrival of storms that meet the criteria for a sampling event for industries subject to the Industrial Stormwater General Permit.
