# Marinas, Boatyards and Boatbuilders

"Under Section 309 of the CWA, penalties for violating the permit or not having a permit to discharge into the waters of the U.S. may be up to $37,500 per violation per day."
— EPA Clean Water Act Statute, Regulations and Enforcement.

ProComplianceWare Key Advantages

- ▶ Safely manages compliance documents in one secure, online location.
- ▶ Assures adherence to all permits and environmental requirements.
- ▶ Reduces the risk of compliance penalties and fines.
- ▶ Enables 24/7 access to records from computers, tablets or smartphones.
- ▶ Provides different levels of data access.
- ▶ Improves record-keeping and storage.
- ▶ Easily set up by in-house staff or environmental consultants.
- ▶ Cloud-based for immediate and constant access to records.
- ▶ A truly affordable, environmental management system.

Get Peace of Mind with ProComplianceWare™

The only system of its kind, ProComplianceWare is a cost-effective, easy-to-use Web-based environmental management system (EMS) that can help you improve compliance management.

ProComplianceWare (PCW) replaces the volumes of paper required to meet regulations and permits for environmental compliance. The system electronically tracks compliance deadlines for inspection, reporting, training and sampling activities imposed by environmental regulations.

"After becoming one of the first Connecticut Clean Marinas, ProComplianceWare was the next logical step towards making Mystic Shipyard a truly environmentally compliant marina. Our consultant uses the PCW system to track day-to-day compliance issues so we no longer wonder whether we are in compliance—we know we are."
— Jeff Marshall, Managing Member

PCW automatically sends alert emails in advance of the date of any required action or filing. It also archives inspection forms, reports and other compliance documents online for easy sorting and retrieval.

Reduce the Risk of Compliance Penalties and Fines

Why risk penalties? Fines can cost hundreds of thousands of dollars. With no software to install and priced at only $250* per month ProComplianceWare is an affordable solution. It is an indispensable tool for any facility that must monitor its environmental impact and maximize profits.

To see a demo of ProComplianceWare, call 1-800-832-8508 or visit www.ProComplianceWare.com.

*Current price, 1 yr. pre-pay.

ProComplianceWare™
ConfidentCompliance™

Marinas, boatyards and boatbuilders can use the PCW system to reduce the risk of environmental fines and penalties.

ProComplianceWare™
ConfidentCompliance™

"Our mission is to provide a transformative, easy-to-use and affordable environmental management software system."

— Edward N. Sailer, CHMM, LEP, President, ProEnvironmentWare, Inc.

Powerful Features and Benefits

▶ Easy set up with a simple and intuitive user interface.

▶ Organizes compliance requirements in a single secure, online location.

▶ Provides links to all forms needed.

▶ Assigns compliance tasks to specific personnel.

▶ Accessed easily by computer, tablet or smartphone at any time.

▶ Available at the low cost of $250* per month.

ProComplianceWare™ Helps Companies Meet Environmental Compliance Requirements

"In FY 2012, EPA enforcement actions required companies to pay over $200 million in civil penalties (administrative and judicial)—an all-time record amount." — Environmental Protection Agency

Easy to Set Up.
Low Cost Protection.

ProComplianceWare is a cost-effective, easy-to-use Web-based environmental management system (EMS) that can help your business improve compliance management.

Compliance and Sustainability.

Sustainable business practices are a necessity for the global environment. Any facility regulated by the Environmental Protection Agency (EPA) or state agencies must be compliant and will benefit from using ProComplianceWare to reduce the risk of penalties and fines.

Reliable. Accessible. Safe.

PCW is a Web-based system—no software to install or update—which can be accessed from computers, tablets or smartphones. The system is hosted on a virtual private server connected to five diverse backbone networks with daily backups for maximum reliability. The PCW site uses Secure Sockets Layer (SSL) to assure data security.

"There's a new mindset among forward-thinking businesses—they are starting to view energy and resource management not just as matters for the compliance department but also as the foundation for running more sustainable operations."

— Heather Clancy, ZDNet Contributor
